

The Infertility Cure

The Ancient Chinese Wellness Program for Getting Pregnant and Having Healthy Babies

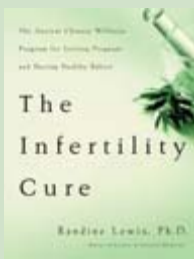

Feb. 18 & 19th, 2006

Fully Booked

Dr. Randine Lewis,
MSOM, L.Ac., Ph.D.

Dr. Randine Lewis is a licensed acupuncturist and herbalist and has studied both Eastern and Western medicine. After attending Osteopathic medical school, she began her career in Traditional Chinese Medicine. She earned her graduate and post-graduate degrees in Acupuncture and Oriental Medicine, focusing on fertility, and performed her internship at the prestigious Dalian Hospital of Traditional Chinese Medicine in China.

Dr. Lewis is a diplomat with the NCCAOM, is a professional member of the American Society for Reproductive Medicine, and is on the Women's Counsel of the ASRM. She supports, lectures, and publishes articles for RESOLVE, the American Infertility Association, and medical organizations, and is a medical expert on numerous online fertility boards. She is devoted to providing quality, natural reproductive enhancement.

TCM and Infertility

Infertility rates have skyrocketed over the last 15 years and now approximately one in six to ten couples experience problems with fertility. Innumerable women grieve the loss of a potential child once a month, and lose a little more hope with each period. Having children has always played an important part in Chinese society. Therefore, there are two thousand years of recorded clinical experience on the Chinese medical treatment of this condition. During this seminar, Dr. Lewis will teach you the *Ancient Chinese Wellness Program for Getting Pregnant and Having Healthy Babies*. If you have infertility patients in your practice, join Randine for this lively and informative two-day class.

Chinese Herbal Medicine and Acupuncture

Acupuncture and herbal therapies are gentle, yet effective. Conventional Western medicine offers a bigger bang, but we liken this to putting a thumbtack in the wall with a sledgehammer. Many women do not need fertility drugs and medically assisted reproductive techniques, yet they go through months of physical and emotional agony, not to mention the financial burden. TCM can put the tack in the wall with a thumb. It is safe, natural, cost effective, and has no side effects. In fact, TCM can help your infertility patients become stronger and help them create a healthier environment for a harmonious pregnancy. In addition, TCM increases the likelihood of conception for those patients who opt for fertility drugs or medically assisted

fertilization techniques.

Although this course focuses on the treatment of infertility with TCM you will also learn about western reproductive technology, how to translate lab readings into TCM diagnostics, and most importantly, how to treat the Western fertility patient – body, mind, and soul.

In this class, you will also discover how to:

- Lower FSH, prolactin, testosterone
- Raise estradiol, progesterone levels
- Translate clinical diagnostics
- Calm endometriosis
- Help implantation
- Improve ovarian response
- Increase pelvic blood flow
- Improve male factor
- Decrease miscarriage risk
- Learn to communicate in reproductive terminology
- Marketing and becoming an expert

Seminar Details
