

Treatment of Infertility with Chinese Medicine

May 26 - 27, 2007 *plus optional third day May 28, 2007*

Jane Lyttleton,
BSc (Hons) NZ, M Phil
(London), Dip TCM (Syd),
Cert Acup/Herb (China)

Jane made a sharp career path change in the late seventies from scientific medical research to Chinese medicine. Studies in Australia and hospitals in China at different times over the following 12 years steeped her in the very different medical system, TCM. She has attempted to bring the best of this medicine to a clinical practice in the west addressing the healthcare needs of western women. 25 years on, she sits comfortably with the logic of both Chinese medicine and western science and feels both can contribute greatly to positive therapeutic outcomes for the patient. The medical climate of Sydney, Australia combined with the demands of well informed patients has allowed a useful degree of interprofessional exchange wherein Jane has been able to share expertise and patient care with GPs and specialists in the area of gynaecology and infertility.

In addition to running a busy practice, Jane is a lecturer at the University of Western Sydney where she teaches post graduate Masters students. She is author of *The Treatment of Infertility with Chinese Medicine* and co-author of *The Clinical Handbook of Internal Medicine Vol 1 and 2*.

Many Western women are leaving childbearing later than biology intended; their hormones and their husband's sperm counts are affected by modern lifestyle and environmental pollutants; and metabolic syndromes, rapidly becoming epidemic in affluent societies, are damaging ovary function. In many cities numbers of "assisted reproduction technology" clinics are multiplying in response to a large and growing demand by these couples unable to have children. However their success is limited and many women are requesting help from doctors of Chinese medicine who offer a gentler and more holistic approach in addressing infertility. China has a long history of addressing fertility difficulties and using this knowledge and adapting it to our modern western situation TCM doctors have something very significant to offer.

This course will cover the sort of approach and specialist knowledge a TCM practitioner needs in order to have a thorough understanding of the basis of infertility from a TCM and Western medical understanding. Diagnostic methods and treatment options will be discussed in detail, as will be the dilemmas and advantages of com-

binning Chinese medicine with IVF programs.

Additional Module
Gynecological conditions which contribute to Infertility - \$170

Polycystic Ovarian Syndrome, Endometriosis, auto immune conditions, clinical cases
Monday, May 28, 2007
9:00 am - 5:30 pm

Seminar Details

When: May 26 & 27, 2007

May 26: 9:00am - 5:30pm

May 27: 9:00am - 5:30pm

plus optional third day on

May 28, 2007

May 28: 9:00am - 5:30pm

Cost: \$425 for two days
plus \$170 for additional module-

Where: The Canadian
College of Naturopathic Medicine
1255 Sheppard Ave. E., Toronto,
ON M2K 1E2 Canada
